

Name: Dana Kim

Contact: dana.kim@example.com, New York, NY

Summary: DevOps and cloud engineer with 6 years of experience automating infrastructure and deploying applications on AWS and Kubernetes. Skilled at building CI/CD pipelines and optimizing system performance.

Technical Skills:

- Cloud platforms: AWS (EC2, ECS, Lambda), Azure
- Tools: Terraform, Docker, Kubernetes, Jenkins, GitLab CI/CD
- Languages: Python, Go, Bash
- Monitoring: Prometheus, Grafana, ELK stack

Experience:

1. **Senior DevOps Engineer**, *CloudOps Ltd.*, 2021–Present – Automated infrastructure provisioning with Terraform, managed microservices on Kubernetes, and optimized deployments.
2. **Site Reliability Engineer**, *TechWorks*, 2018–2021 – Built monitoring dashboards, improved system scalability, and reduced deployment times through CI/CD.

Education: B.S. in Computer Engineering, Columbia University (2017)
